### Prescribed Burn Planned for Monterey County

**Carmel, CA** – Conditions and weather permitting, CAL FIRE and California State Parks plan to conduct multiple days of pile burning in Hatton Canyon (Ishxenta State Park). Operations will occur near the area of Highway 1 and Carpenter St in High Meadows of Carmel during the months of March and April. The purpose of the project is to remove excess dead vegetation between Highway 1 and High Meadows Rd. The rescheduled day of burning will take place on March 25, if conditions permit.

This prescribed fire project was planned as part of broader strategic efforts to protect the local community and nearby natural resources. These plans are informed by community and local stakeholder input and serve as a collaborative effort with a range of cooperators throughout the course of the project. This project adds to significant work underway throughout the state and brings California one step closer towards meeting or exceeding state fuels reduction goals directed by the California Fire Plan and the [California Wildfire and Forest Resilience Action Plan](#).

Each operation follows a specialized burn plan, which considers temperature, humidity, wind, moisture of the vegetation, and conditions for dispersal of smoke. All this information is used to decide when and where to burn.

Smoke from prescribed fire operations is normal and may continue for several days after an ignition depending on the project size, conditions, and weather. Prescribed fire smoke is generally less intense and of much shorter duration than smoke produced by wildland fires.

Smoke from this control burn will be visible in the Carmel area. Weather conditions will be monitored, and burn may be postponed if burning conditions are found to be unfavorable. CAL FIRE is in close consultation with the National Weather Service's Monterey office and Monterey Bay Air Resources District to ensure that burning takes place in appropriate weather conditions; the project may be postponed if conditions are not conducive to a safe burn.

To be added to the Prescribed Fire Notification list, send a request to [BEU.ResourceManagement@fire.ca.gov](mailto:BEU.ResourceManagement@fire.ca.gov) or scan the QR code.
